SOCCKER ACADEMY HEALTH SERVICE

HEALTH SERVICE will be provided by Soccer Academy at the Residential camps. In order to render effective medical care, in the absence of the parents, the health service must have adequate Medical Records and written consent. A health form with a medical history and consent is required by all players attending and is attached.

*** I am sure you will know from your own experience of dealing with Doctors and medical personnel, that some Doctors will not provide service unless medical information is both available and accurate. I, as the Director of the camp, have listed some of the criteria that I am required to conform with. Your help is greatly appreciated and it will certainly assist me in ensuring your child is well cared for should the need arise. ***

Our locations have health centers with medical staff. However, the Doctor, in addition to providing service to the college, also have private practice located locally and are part of the local hospital staff. Therefore, in an emergency we may well be required to use the local hospital which are all located within a short distance of the camp or for minor illness be instructed to take the child to the Doctor.

Parents and family physicians are expected to report exposure to contagious disease within the accepted period of communicability. Candidates with medical, emotional or surgical problems which will require continued observation and special care while on campus should be discussed and approved by the Director prior to registration in the program. Such conditions would include diabetes, mellitus, epilepsy, orthopedic limitations, emotional problem for which candidate is currently being counseled, etc.

SELF-MEDICATION IS NOT PERMITTED. Boys or girls who require medication prescribed by outside physicians must register the medication on arrival with our trainer. Physicians are requested to limit quantities of all drugs prescribed and to see that labels provide the name, amount and dosage of the drug. For obvious reasons, large quantities of controlled drugs cannot be permitted in dormitory areas where they could fall into the hands of other individuals.

MEDICAL SUPPLIES

Soccer Academy will continue to provide medical supplies for immediate First Aid. Trainers will be provided to tape players prior to activities. **However, if players attend camp with pre-existing injuries they are required to provide their own tape, ace bandages, etc. Failure to provide this medical equipment will result in a fee being charged.**

PAYMENT

No charge is made for on-campus health service provided. This includes standard stock medication (Aspirin, Tylenol and cough syrup) outpatient and inpatient care when indicated for observation, and diagnosis. There is a limitation of free health services for pre-existing conditions.

Payment for medical or surgical treatment, consultations, laboratory studies, X-ray examinations, prescriptions or special drugs and supplies, and hospitalization will be the direct responsibility of the parent or guardian. Prompt payment is essential since failure to discharge these obligations would make it difficult, if not impossible, to obtain continued service. Campers or participants in the Programs who are not US citizens must be covered by Health and Accident Insurance. When costs are incurred you will be informed and payment will be required when your child is collected from camp.

In the event that a player is admitted to the Hospital or the Health Center, an attempt will be made to contact the parents to notify them of an illness/need to stay overnight. In all cases, except emergencies, prior parental permission or authorization for any outside health care will be obtained.

I have had this information compiled to ensure you know of the procedures. Fortunately, we rarely have emergencies. At times, we do put a player in the health center for twenty-four hours if they are having an 'off day' but you can be assured you will be kept fully informed. Ensuring your telephone number is correct helps us.
